Installation

- 1 Ensure mains supply is switched off
- 2 Mark ceiling with appropriate cut-out size
- 3 Before cutting, ensure that the hole does not impinge on joists, pipe work, cables or other building services
- 4 Ensure there is at least 100mm of free space around and 50mm above the luminaire. Place the transformer 300mm from the lamp. Do not cover the luminaire with thermal insulation
- 5 Connect transformer output to fitting terminals (polarity is unimportant). **DO NOT EARTH**
- 6 Offer luminaire up to cut-out with the springs being held vertically. The luminaire is retained in position by spring tension against the ceiling
- 7 **Lamp installation and replacement:** Ensure mains supply is off. When operating the luminaire is too hot to touch. Switch off and allow to cool before undertaking any maintenance work. Unscrew crystal to access lamp. Replace lamp and refit crystal. Do not overtighten!
