## HSML390S Mirror with 15W T8 fluorescent backlight with pull cord and energy efficient fluorescent lamps

### Installation

- 1 Ensure mains supply is switched off before undertaking any installation or maintenance work. Ensure that the wall is dry before fitting mirror.
- 2 Before drilling fixing holes, establish the direction of buried cables so that damage to concealed building wiring can be avoided.
- 3 This luminaire must be mounted directly to the wall with lamps vertical.
- 4 To remove mirror from back box, undo screws located on either side.
- 5 Drill appropriate wall fixing holes. The mains terminal block is located behind a cover at the back of the lamp compartment.

Thread wires through the backbox, fix the fitting to the wall, connect brown (or red) wire to L terminal, blue (or black) to N terminal and green/yellow to earth terminal.

### Maintenance

Replace failed tubes or starters promptly. Failure to do so can result in premature control gear failure.

A tube has reached the end of its economic life when it fails to strike, flickers very noticeably or flashes on and off in normal use.

*Please note:* that if the end of the tube glow continuously and the lamp does not attempt to strike, the starter also needs to be replaced.

### Technical specifications:

**SUPPLY VOLTAGE:** 230V-240V~50Hz; must be earthed

**LAMP:** 15W T8 fluorescent tube (x2); Non Dimmable

**STARTER:** 4W to 65W (OSRAM ST111 or Philips S10)

**TEMPERATURE RANGE:** 5°C to 40°C, Indoor use only

**PROTECTION AGAINST ELECTRIC SHOCK:** Safety Class I

**IP44;** Suitable for mounting in bathroom Zone 2 above a sink

Not suitable for use within 60cm of a shower

Complies with EN 60 598
